EDUCATION

Bachelor of Technology in Computer Science and Engineering **Expected June 2027**
VIT Bhopal University **CGPA: 8.57**
Relevant Coursework: Data Structures and Algorithms, Machine Learning, Deep Learning, Database Management Systems, Object-Oriented Programming, Computer Networks, Operating Systems, Statistics for Data Science

Class 12th: 95.6% ; Class 10th: 97.6% 2020 - 2022
Modern Delhi Public School

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL
Machine Learning & AI: TensorFlow, PyTorch, Keras, Scikit-learn, Deep Learning, Neural Networks, CNN, RNN, LSTM, NLP, Computer Vision, Recommender Systems, Supervised & Unsupervised Learning
Data Science: Pandas, NumPy, Matplotlib, Seaborn, Data Preprocessing, Feature Engineering, Data Visualization, Statistical Analysis, Exploratory Data Analysis, Time-Series Forecasting
Tools & Technologies: Git, GitHub, Jupyter Notebook, Google Cloud Platform, VS Code, PyCharm, REST APIs, Model Deployment, Linux

PROJECTS

Heart Disease Prediction Model — *Python, Scikit-learn, Pandas, Machine Learning*

- Developed a classification model using K-Nearest Neighbors, Support Vector Machine, Decision Tree, and Random Forest to predict heart disease with **87% accuracy**.
- Performed data preprocessing including feature scaling, exploratory data analysis, and model optimization using hyperparameter tuning.
- Compared multiple machine learning algorithms and selected the best-performing model (KNN, k=8) based on evaluation metrics.
- Created visualizations using Matplotlib to analyze key medical indicators influencing heart disease.

Fake News Detection using NLP and Machine Learning —*Python, Scikit-learn, Pandas, NLP, TF-IDF*

- Built an NLP-based fake news detection system using TF-IDF feature extraction & supervised machine learning classifiers.
- Performed end-to-end text preprocessing including data cleaning, tokenization, stopword removal, and vectorization of news articles.
- Trained and compared Multinomial Naive Bayes, Bernoulli Naive Bayes, and Logistic Regression models, visualizing performance using Matplotlib for model selection..
- Achieved **95% classification accuracy** using Logistic Regression, outperforming other baseline models.

CERTIFICATIONS

Applied Machine Learning in Python — University of Michigan Dec 2024
Workshop on Containers and AIML on AWS Cloud — Cognizance, IIT Roorkee Apr 2024
AWS Cloud Clubs Machine Learning Camper — United Latino Students Association Mar 2024
Crash Course on Python — Google Nov 2023

ADDITIONAL INFORMATION

- **Languages:** Fluent in English and Hindi; Basic proficiency in French
- **Achievement:** Cleared two competitive rounds and reached the final stage of a Health Hackathon by developing an ML-powered healthcare solution; applied machine learning algorithms and data analytics to build an innovative system recognized by industry experts and judges.
- **Soft Skills:** Problem-solving, teamwork, leadership, communication, time management, adaptability
